

MARK MOMOH

Technical Program Manager | Cross-Functional Delivery | 7+ Years

Lagos, Nigeria • +2348167536019 • Mark_momoh@yahoo.com • <https://www.linkedin.com/in/markmomoh/>

PROFESSIONAL SUMMARY

Technical Program Manager with 7+ years leading complex, multi-disciplinary programmes across web, mobile, and digital platforms in the fintech and banking sector. Proven ability to manage cross-functional teams, drive measurable delivery outcomes, and influence stakeholders at all levels without formal authority. Track record of shipping consumer-facing products at scale — including platforms serving users across 20 countries. PMP®, SAFe® 6 Advanced Scrum Master, CSM®, and CSPO® certified.

CORE COMPETENCIES

Technical Programme Management • Cross-Functional Leadership • Agile & SAFe® Delivery • Risk Identification & Mitigation • Stakeholder Influence • Launch Readiness • Dependency Management • OKR/KPI Tracking • Process Design & Scaling • Multi-Team Coordination

PROFESSIONAL EXPERIENCE

Technical Program Manager | **Sterling Bank, Lagos** | *January 2024 – Present*

- Accelerated digital product delivery by 25% by introducing structured launch readiness frameworks and real-time Scrum dashboards, enabling engineering leadership to resolve blockers 40% faster across concurrent mobile and web workstreams.
- Improved cross-functional alignment across engineering, product, legal, and compliance teams by establishing a weekly dependency review cadence, reducing release delays caused by late-stage blockers by an estimated 30%.
- Delivered the Specta New Build — a full consumer mobile app and web platform — on schedule and within scope by coordinating 4 cross-functional teams across a 9-month delivery programme, directly contributing to measurable revenue and customer engagement growth for the bank.
- Increased sprint predictability by coaching Product Owners on backlog refinement and prioritisation techniques, reducing scope creep incidents by approximately 35% across 3 concurrent product workstreams.
- Managed simultaneous delivery of Specta Xtreme, Specta Basic, and Business Support Facility 2.0 by maintaining separate programme plans, risk registers, and stakeholder communication cadences for each workstream, with all 3 delivered on schedule.

Technical Program Manager | **Interswitch Limited, Lagos** | *August 2022 – January 2024*

- Increased team productivity by 30% within 6 months by implementing targeted Agile coaching, restructuring sprint ceremonies, and introducing clear definition-of-done criteria across an 8-person engineering squad.
- Improved team efficiency by 20% by designing and deploying an Impediment Tracking framework that created visibility into cross-team blockers, reduced average resolution time, and surfaced systemic process gaps for leadership.
- Reduced cross-team dependency conflicts by representing 3 squads in Scrum of Scrums, enabling early identification and resolution of integration risks before they impacted sprint velocity.
- Improved backlog quality and delivery predictability by partnering with 2 Product Owners on structured refinement sessions, reducing mid-sprint requirement changes by an estimated 25%.
- Accelerated SAFe® adoption across the organisation by facilitating PI Planning, System Demos, and Inspect & Adapt workshops for an Agile Release Train of 40+ team members, resulting in improved cross-team alignment and a measurable reduction in duplicate work.

Technical Program Manager | **VFD Tech Limited, Lagos** | *April 2022 – July 2022*

- Reduced requirement ambiguity by 40% by introducing a structured stakeholder requirements workshop process that produced documented, signed-off functional specs before build commencement — eliminating mid-sprint scope changes on the AML/PEP screening integration.
- Improved system reliability and consumer trust by delivering 5 critical enhancements to the Core Banking Application within a compressed 3-month timeline, coordinating across 2 internal engineering teams and 1 external vendor.

Technical Program Manager | **United Bank for Africa (UBA), Lagos** | *October 2018 – April 2022*

- Delivered LEO WhatsApp Chatbot — a consumer-facing personal banking assistant — across 20 African countries within 12 months by coordinating engineering, product, compliance, legal, and go-to-market teams across multiple time zones, driving a significant increase in digital channel engagement.
- Reduced biller onboarding time by 30% by designing a repeatable onboarding playbook for UBA's digital channels (USSD, Mobile Banking, Internet Banking), enabling the onboarding of 10+ billers onto the platform and contributing directly to non-interest revenue growth.
- Improved transaction accuracy and customer trust in cross-border transfers by leading the end-to-end implementation of Swiftcode & IBAN Validation Service, reducing transaction error rates and cutting related customer service escalations.
- Managed programme delivery across 20 countries simultaneously by maintaining detailed project plans, dependency maps, and risk registers for each market, ensuring consistent milestone delivery despite varying regulatory and infrastructure constraints.
- Enhanced customer experience across mobile and web channels for millions of users by leading the delivery of an omni-channel banking platform, coordinating 6 cross-functional teams over an 18-month programme.

EDUCATION & CERTIFICATIONS

M.Sc. Information Technology — National Open University of Nigeria | 2025

B.Eng. Information and Communication Engineering — Covenant University, Nigeria | 2016

- Project Management Professional (PMP®) | PMI | 2022
- SAlFe® 6 Advanced Scrum Master | Scaled Agile, Inc. | 2023
- Certified ScrumMaster® (CSM) | Scrum Alliance
- Certified Scrum Product Owner® (CSPO) | Scrum Alliance
